SUMMARY

Experienced Odoo Techno Functional Consultant with expertise in Odoo delivery, functional analysis, configuration, and custom development. I translate stakeholder needs into practical solutions, coordinate technical teams, and help businesses streamline operations through cost-effective ERP improvements. My experience spans Odoo module implementation, workflow optimization, integrations, and client support, with a focus on delivering reliable solutions that improve efficiency and enable sustainable business growth.

EXPERIENCE

Theta Direct LLC — Banglore, India
Odoo Techno Functional Consultant — January 2025 - Present

- Interact with clients to understand their business processes and gather functional requirements. Translate those into functional specifications for Odoo customization.
- Analyze client workflows and suggest how Odoo can streamline their operations. Understand various Odoo modules, including Sales, Accounting, Inventory, and HR, and how they apply to specific industries.
- Configure Odoo modules, including Sales, Purchase, Accounting, and Inventory, according to the client's needs. Set up users, permissions, and workflow automation.
- Manage Odoo delivery activities by translating stakeholder requirements into actionable specifications, prioritizing enhancements, and coordinating development through validation and release.

BizzAppDev Systems Private Limited — Ahmedabad, India
Senior Odoo Developer — February 2024 - November 2024

- Supervise the development process, development support, code reviews, and team management.
- Collaborate closely with project managers to gather business requirements, provide timelines, and manage project deliveries.
- Diagnose and resolve complex technical issues within Odoo, including performance bottlenecks, server errors, and functional bugs.
- Provide functional and technical support to clients, helping them understand Odoo capabilities and providing tailored recommendations.
- Lead requirement clarification, delivery planning, code reviews, and client acceptance for Odoo enhancements while coordinating teams to resolve technical risks and defects.

BizzAppDev Systems Private Limited — Ahmedabad, India
Odoo Developer — September 2021 - February 2024

- Created custom modules, extended core modules, and implemented business logic.
- Developed and managed RESTful and XML-RPC API integrations with third-party applications such as Amazon, Shopify, Magento, and eBay.
- Worked with supply chain, e-commerce, and point-of-sale-related modules.
- Analyzed business workflows and translated process requirements into scalable Odoo solutions, balancing standard functionality with targeted customizations.

Mindarray Systems Private Limited (Motadata) — Ahmedabad, India
Software Developer Trainee — October 2020 - March 2021

- Retrieved data from AWS to the local system to later display the information in the user interface.
- Gained hands-on experience with API tools and technologies, AWS services, and Golang.

EDUCATION

Hasmukh Goswami College Of Engineering • CGPA: 8.27/10 — Vehlal, Gandhinagar, India
Bachelor of Engineering in Information Technology — 2020

- Created an ALPR (Automated Licence Plate Registration) system using Python that recognizes rule and regulation violations occurring at traffic signals and identifies vehicle number plates.
- Tools and technologies: Python, Django, Bootstrap, CSS, HTML, API, PyTorch, Postman.

Raghuvir School Of Science • Percentage: 60% — Nikol, Ahmedabad, India
Science Stream — 2016

SKILLS

Technical Skills: Python, HTML/CSS/JS/XML, OWL, Odoo SH, Odoo Framework(14-20), PostgreSQL, API, Postman, Docker, Asana, Odoo Studio, Project Management, Requirements Gathering, Quality Assurance, Process Mapping
